В січні 1921 року Всеукраїнська Академія Наук понесла тяжку, незамінимy втрату: помер її невтомний, тямущий співробітник, найкращий знавець палеографії в Київі, Ів. Мих. Каманін, член Археографічної Комісії при Академії Наук і керовничий Центрального Архіву давніх актів. Смерть його не дала спромоги для Академії Наук випустити в світ його книжку про «Водяні знаки» так, як бажалося-б, себто з авторовою передмовою. На наше запрохання, ласкаво згодився написати коротке вступне слово проф. С. І. Маслов. А що праця небіжчика І. М. Каманіна природно доповнює собою відому російську працю Н Ліхачова: „Палеографическое значеніе бумажныхъ водяныхъ знаковъ“ (Спб. 1899), то вступне слово проф. С. Маслова подається тут і українською мовою і російською.

Зацікавлення до студій над папером та над його водяними знаками повстало на Заході на-прикінці XVIII віку, та й у Росії виявило себе в 20-их і 40-их роках XIX століття, коли вологодський купець І. Лаптів видрукував був свій „Опытъ въ старинной русской дипломатикѣ“ (Спб. 1824), а К. Тромонін видав „Изъясненіе знаковъ, видимыхъ въ писчей бумагѣ“ (М. 1844). А надто збільшилося тее зацікавлення в другій половині XIX-го та початку XX віку та й позначилося виходом капітальних філігранографічних розвідок E. Midoux et Aug. Matton, D. Urbani, Aur. Zonghi, C. M. Briquet, Н. П. Ліхачова, Fr. Piekosińskiego й инш. Завдяки працям цих-о дослідників, можна вважати, що загальними рисами вже з'ясовано історію того, як виникло паперове виробництво і як розповсюднювавсь папір по геть усяких краях Европи.

Число зарисованих і виданих філігранів, які являються основним матеріялом на те, щоб визначити, коли та де папір вироблено, становить собою не аби-яку цифру: на теперішній час їх рахують уже тисячами. От, у двох працях вищезгаданого російського дослідника Н. П. Ліхачова: „Бумага и бумажныя мельницы въ Московскомъ государствѣ“ (Спб. 1891) та „Палеографическое значеніе бумажныхъ водяныхъ знаковъ“ (Спб. 1899) згуртовано по-над 5.000 філігранів, а в C. M. Briquet в чотирьох томо-

Интерес к изучению бумаги и ее водяных знаков, возникший на Западе в конце XVIII ст., проявившийся также в России в 20-ых и 40-ых годах XIX в., когда вологодский купец И. Лаптев напечатал свой „Опытъ въ старинной русской дипломатикѣ“ (Спб. 1824) и К. Тромонин издал „Изъясненіе знаковъ, видимыхъ въ писчей бумагѣ“, (М. 1844),—особенно усилился во второй половине XIX и начале XX ст. и ознаменовался появлением капитальных филигранографических исследований E. Midoux et Aug. Matton, D. Urbani, Aur. Zonghi, C. M. Briquet, Н. П. Лихачева, Fr. Piekosińskiego и др. Благодаря трудам этих исследователей история возникновения бумажного производства и распространения бумаги в различных странах Европы в общих чертах может считаться выясненной.

Число зарисованных и изданных филиграней, являющихся основным материалом для определения времени и места выделки бумаги, представляет собою не незначительную цыфру: они в настоящее время исчисляются уже тысячами. В двух, например, работах вышеназванного русского исследователя Н. П. Лихачева: „Бумага и бумажныя мельницы въ Московскомъ государствѣ“ (Спб. 1891) и „Палеографическое значеніе бумажныхъ водяныхъ знаковъ“ (Спб. 1899) собрано более 5000 филиграней, а у C. M. Briquet в четырехтомном издании „Les Filigranes“ (Pa-

вому виданні „Les Filigranes“ (Париж 1907) скількість виданих знаків переходить 16.000. Тільки-ж, коли ми візьмемо на увагу, що виробництво паперу існує в Европі вже більш од 8 століттів, і що протягом того періоду папір виготовлявсь на дуже багатьох фабриках, і що одна й та сама фірма випускала неоднакові сорти та й більше-менше в скорості міняла філіграні, прийняті за фабричні марки, — то не можна буде не визнати, що число досі зібраних водяних знаків недостатнє, і що царину філігранографії все ще мало розроблено не тільки в нас, ба й у Західній Европі. До цього можна додати, що переважна частина дослідників з'осереджує свою увагу головним чином на давньому папері. Отак, у Пекосіньского досліджено знаки лише XIV та XV в., у Брікé згуртовано філіграні до 1600 р., в Н. П. Ліхачова переважно до початку XVII в. Папір XVII й XVIII століттів, як порівняти з иншими, ще й досі вивчено не гаразд.

З огляду на таке становище справи, завідатель Київського Центрального Архіву давніх актів (тепер — академічного) І. М. Каманін, „принимая во внимание, что существующие сборники водяных знаков далеко не удовлетворяют практическим запросам, как при выдаче свидетельствуемых Архивом выписей, так и при научных работах“ [1]), надумавсь дослідити багатющу збірку датованих документів, що з неї склавсь Київський Центральний Архів. Близько 1896-го р. Олександра Іллінічна Вітвіцька, служивши в Архіві, заходилася під керівництвом І. Каманіна систематично переглядати актові книжки та перемальовувати їхні філіграні. В результаті трохи чи не 20-річної праці вона зібрала по-над 4.000 знаків із книг XVI-XVII й XVIII вв. З оцього числа тут видано лиш №№ 1-1336 — водяні знаки з актових книг 2-ої половини XVI-го та здебільша 1-ої половини XVII в. Небіжчик Каманін мав на думці подати на чолі видання свою чималу спеціяльну розвідку, обсягом так аркушів на 5 (=сторінок 80). В

[1]) Див. автобіографічну записку І. М. Каманіна, що зберіглася в Ол. Іл. Вітвіцької.

ris 1907) число изданных знаков превышает, 16.000. Однако, если принять во внимание, что производство бумаги в Европе существует более восьми веков, что на протяжении этого периода изготовлением бумаги занималось множество фабрик, что одна и та же фирма выпускала различные сорта и более или менее быстро меняла принятые в качестве фабричных марок филиграни, — нельзя не признать, что число собранных водяных знаков является недостаточным и что область филигранографии все еще мало разработана не только у нас, но и в Западной Европе. К этому можно прибавить, что большинство исследователей сосредоточивает свое внимание главным образом на изучении старой бумаги. Так, у Пекосинского обследованы только знаки XIV и XV ст., у Брике собраны филиграни до 1600 г., у Н. П. Лихачева преимущественно до начала XVII в. Бумага XVII и XVIII ст. остается изученной сравнительно мало.

В виду такого положения дела заведующий Центральным Архивом старих актов (ныне при Академии Наук) И. М. Каманин, „принимая во внимание, что существующие сборники водяных знаков далеко не удовлетворяют практическим запросам, как при выдаче свидетельствуемых Архивом выписей, так и при научных работах“ [1]), пришел к мысли обследовать богатейшее собрание датированных документов, какое входит в состав Киевского Центрального Архива. Около 1896 г. под руководством И. М. Каманина служившая в Архиве Александра Ильинишна Витвицкая приступила к систематическому просмотру актовых книг и зарисовке встречающихся в них филиграней. В результате почти 20-летней работы ею было собрано больше 4000 знаков из книг XVI, XVII и XVIII вв., из числа которых тут изданы лишь №№ 1-1336 знаков из актовых книг второй половины XVI и преимущественно первой половины XVII в. Покойный Каманин предполагал предпослать изданию свое специальное

[1]) См. автобиографическую записку И. М. Каманича, сохранившуюся у Ал. Ил. Витвицкой.

ній, коли судити з залишених після нього заміток, хтів він був вистежити, звідки походить папір, зужитий на актові книги, та який є зв'язок поміж згуртованими тут знаками та польськими геральдичними емблемами, то-що. На жаль, розвідка, що її кохав у своїй душі небіжчик, залишилася ненаписана.

Видані в оцьому випускові філіграні містять у собі здебільша гербові емблеми польських шляхетських фамілій. Отже доводиться зробити висновок, що для актових книг брався переважно той папір, який вироблявсь по польських паперових млинах, що виникли в половині XVI в.

В альбомі, що тут подається, знаки розташовано систематичним розпорядком і розміщено по основних типах: гербовий щит із хрестом у підкові (польський герб Jastrzębiec), знаки з гербами Elita, Abdank, Topór, Gozdawa і т. д. Кожен тип представлено цілою низкою варіянтів. Це дає змогу судити про його еволюцію і таким чином збільшує точність палеографічної демонстративности зібраних у виданні філігранів.

исследование, об'емом листов в 5 (=страниц 80) в котором, судя по сохранившимся заметкам, хотел рассмотреть вопрос о происхождении бумаги, использованной для актовых книг, о связи собранных знаков с польскими геральдическими эмблемами и т. п. К сожалению, исследование, мысль о котором так любовно лелеял покойный в душе, осталось ненаписанным.

В виду того, что изданные в настоящем выпуске филиграни содержат в большинстве случаев гербовые эмблемы польских шляхетских фамилий, приходится заключить, что для актовых книг употреблялась по преимуществу бумага, вырабатывавшаяся возникшими в половине XVI ст. польскими бумажными мельницами.

В предлагаемом здесь альбоме знаки расположены в систематическом порядке, и размещены по основным типам: гербовой щит с крестом в подкове (польский герб Jastrzębiec), знаки с гербами Elita, Abdank, Topór, Gozdawa и пр. Каждый тип представлен целым рядом вариантов, что дает возможность судить о его эволюции и таким образом увеличивает точность палеографической показательности собранных в издании филиграней.

1923 р. $\frac{\text{30 січня.}}{\text{12 лютого.}}$ *С. Маслов.*

Наче передчуваючи свою близьку смерть, І. М. Каманін у додатку до найостаннішої своєї книжки, яка побачила світ за авторового життя: „Звѣринецкія пещеры" (К. 1914), вмістив показчика своїх наукових писаннів, надрукованих протягом 40 літ його вченої діяльности. Той показчик наочно й вимовно свідчить, якого робітника втратила наука. Вічна тобі пам'ять, незабутній!
